eCar Design

Autonomous Vehicles (1957)

“ELECTRICITY MAY BE THE DRIVER.

*One day your car may speed along an electric super-highway,
its speed and steering automatically controlled by electronic devices embedded in the road.
Highways will be made safe - by electricity!
No traffic jams...no collisions...no driver fatigue."*

Advertisement from 1957 for "America's Independent Electric Light and Power Companies" (art by H. Miller).

- New Interactions between Automakers and Customers / Drivers
- Data generated by Vehicle Sensors (Connected Vehicle)
- Big Data Captures and Integrates Vehicle's Data
- Integrated view of the Connected Vehicle
 - Real-time insight of Performance of the Vehicle
 - Analyzing Vehicle in the field to Predict / Anticipate Maintenance
 - Integration of Vehicle Data with Operating Environment Data (Weather, Traffic, Hazardous situations)

Automatic connects your car to a world of apps

Your car is a computer,
it has data hidden inside it
about your mileage, gas usage, performance, and even its engine health

CleanTech Design

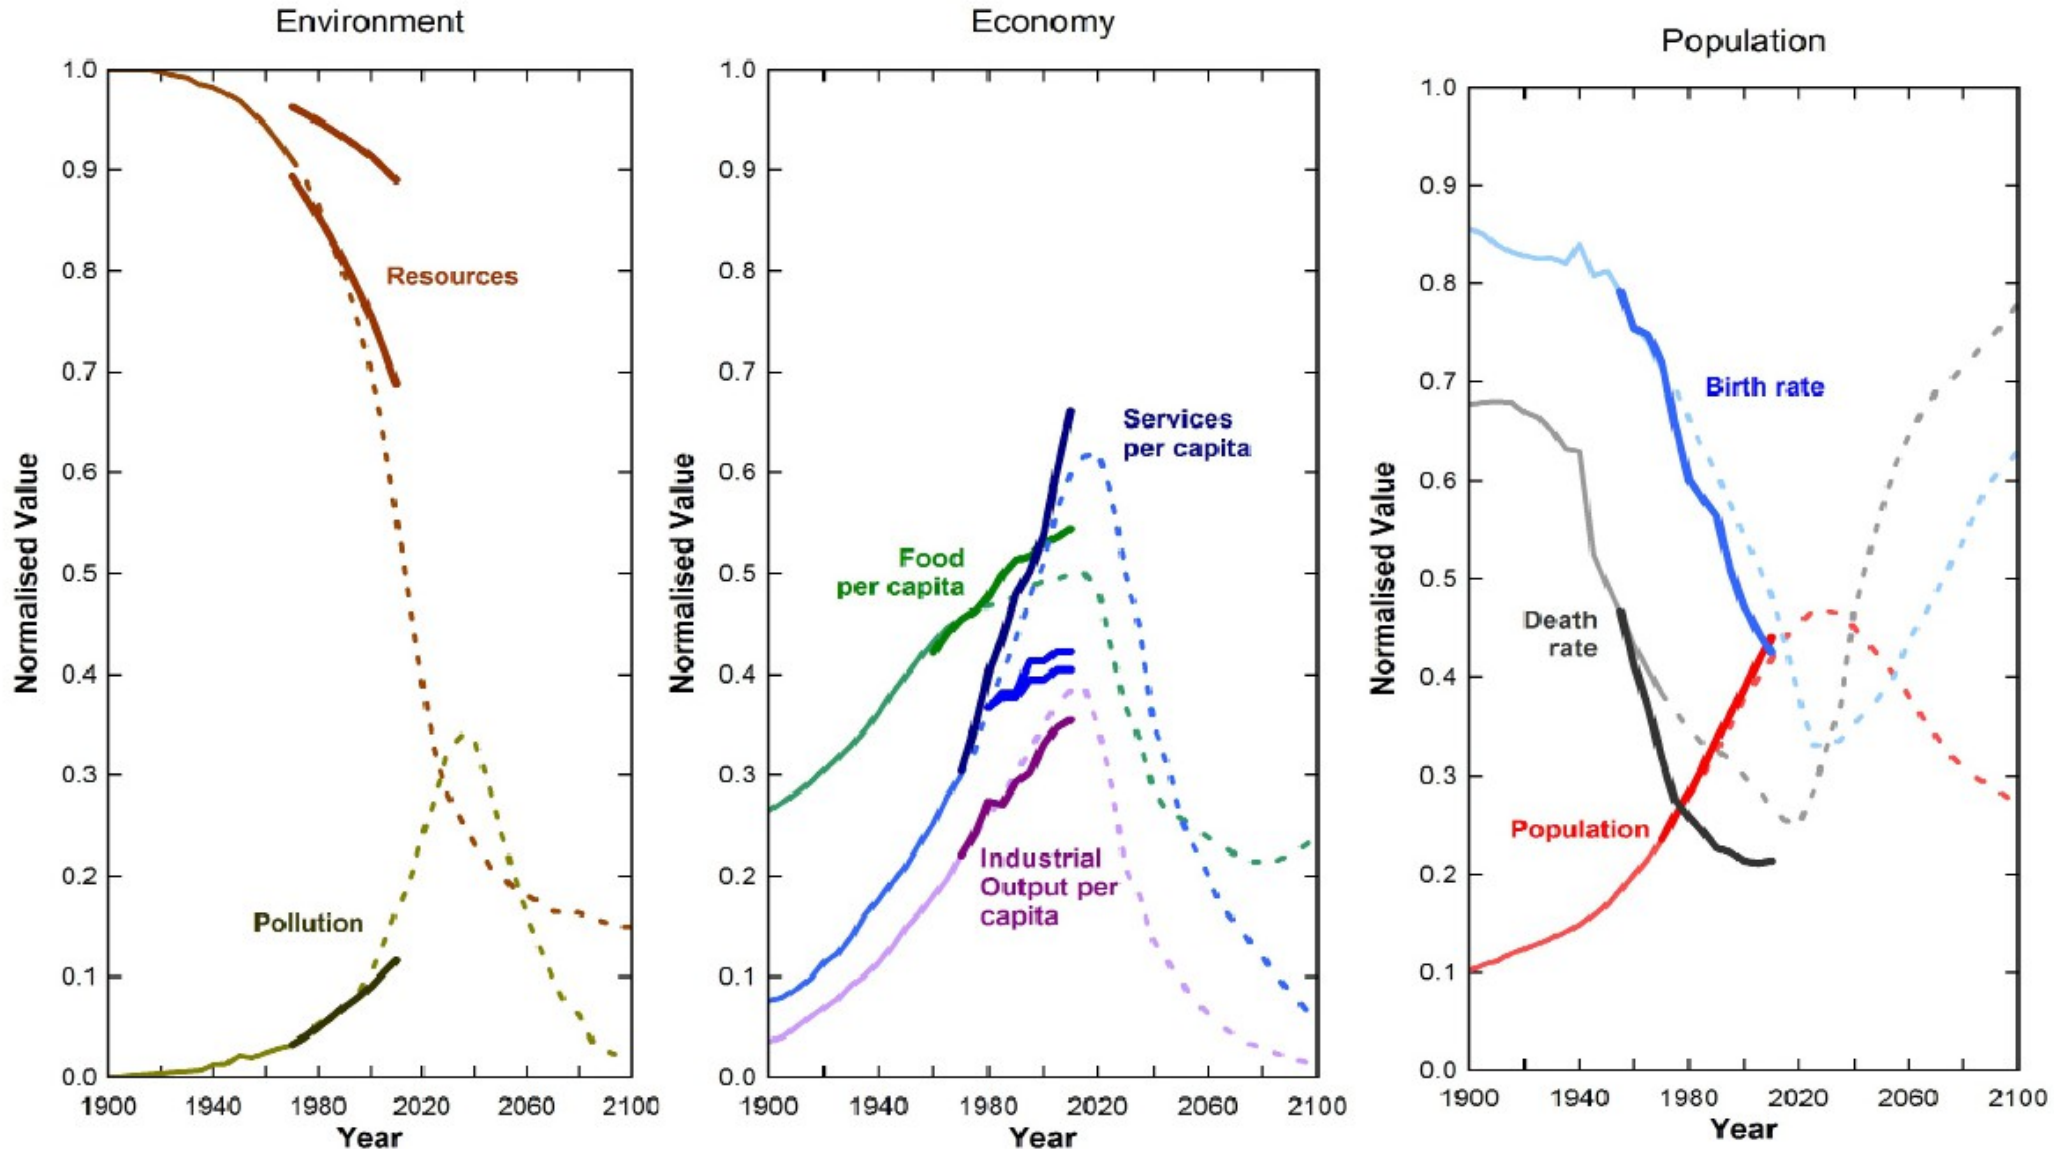

Wave4Energy

*"By the Inertial Sea Wave Energy Converter (ISWEC)
the Sea Waves' mechanical power at the axis
is converted in electricity by a Power Take Off"*

Club di Roma

e-Accessibility

Stephen Hawking
(Oxford, 1942 -)

make ICT accessible to all
meeting a wide spectrum of people's needs
in particular any special needs.

Loccioni Apoteca

Cobots

Collaborative Robots

Robots intended to physically interact with humans in a shared workspace
(in contrast with other industrial robots,
designed to operate autonomously / with limited guidance)

Radical change in Human-Machine Interaction (HMI)
Safety issues: ISO/TS 15066:2016 specifies safety requirements for Cobots

APOTECACHemo

Good, clean and fair.

The first fully automated system for the preparation of cytostatic drugs. The system prevents any form of contamination, in total safety for technicians and patients.

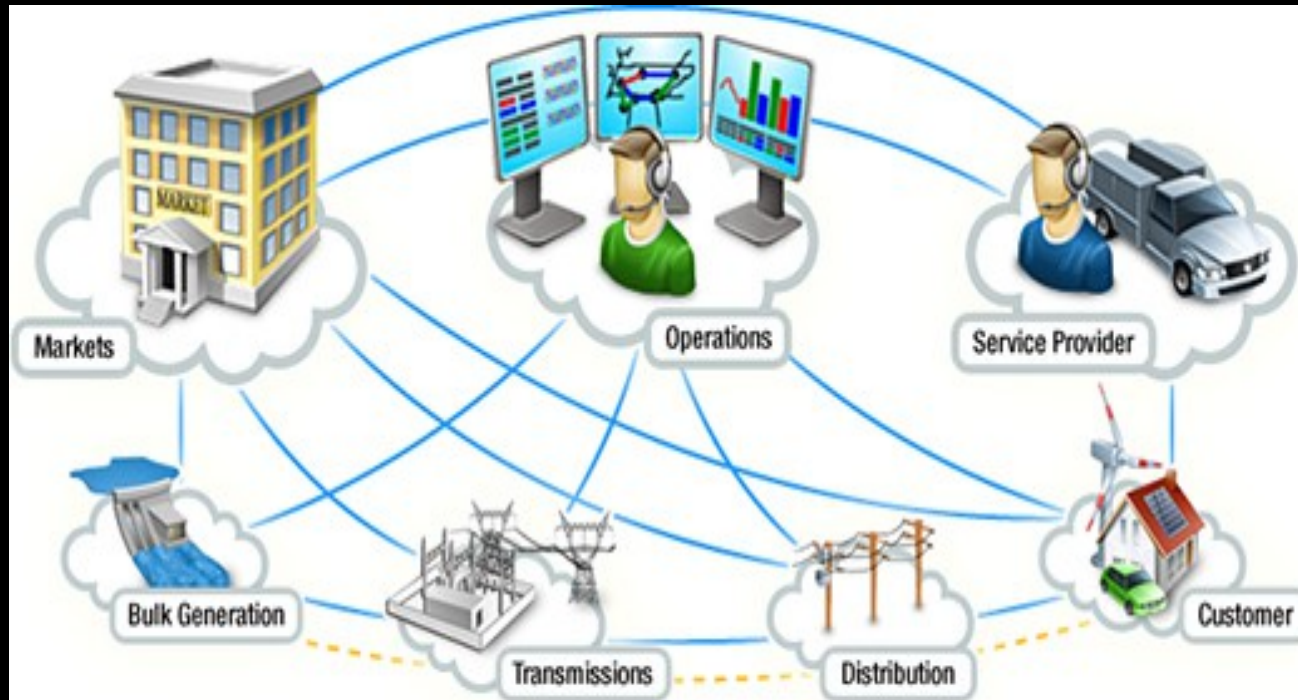

APOTECACHemo

Community Grids

Smart Grid: a Complex System based on Energy + Information!

- Standardized Architectural Concepts
- Data Models and Protocols
- Interoperability, Reliability, Security and Evolvability
- New Measurement Methods and Models (to Sense, Control and Optimize)
- Needed Skills
 - METROLOGY: Metering, Wide Area Monitoring (SynchroPhasors, Phasor Measurement Unit, PMU), Power Conditioning, Building Energy Management, Electricity Storage
 - STANDARDS: Interoperability, Cyber-Security, Information & Communication Technologies

Vandebbron: Energy KM-zero

Holland's indep.prod. (up to 1 million customers potentially)

The logo for Vandebbron, featuring the company name in a bold, lowercase, sans-serif font, followed by a stylized 'v' symbol.

- Type of contract (1, 3 years)
- How much power you need
- Select producer!

(each described by own page, e.g.

Farmers Kadijk, northern Holland, have a single wind turbine, produce power for 600 households, 28 cents / Kwh)

- Subscribe online, self-service!
- **Producers** can get a higher price because bypass the utilities
- **Consumers** save money because bypass mark-up utilities
- Individuals pay exactly the price established by producers
- Vandebbron charges a flat subscription fee / month (10 Euro) to each side
- Business case for investing in sustainable production

Vandebbron interests aligned with customers: when customers save energy, it can sign up more customers for each producer, which increases its subscription fees

Loccioni Leaf Community

La Leaf Community, un progetto inaugurato nel 2008, rappresenta la prima comunità integrata completamente ecosostenibile in Italia realizzata dal Gruppo Loccioni ad Angeli di Rosora (AN) in collaborazione con un network di imprese e di associazioni di eccellenza (tra le quali la Legambiente e il Kyoto Club). La Leaf Community accoglie migliaia di visitatori ogni anno rappresentando un esempio per istituzioni, università, comuni, imprese, scuole, un modello di progetto territoriale, un laboratorio visitabile nel cuore delle Marche

Knowledge as a Commons

Artificial intelligence experts sign open letter to protect mankind from machines

The Future of Life Institute wants humanity to tread lightly while developing really smart machines.

by **Nick Statt** @nickstatt / January 11, 2015 4:10 PM PST

AI Weapon Moratorium?

Musk, Hawking, Wozniak call for ban on autonomous weapons and military AI

Dozens of researchers and tech experts want to prevent a "military AI arms race."

by **Sebastian Anthony** - Jul 27, 2015 3:58pm CEST

"The key question for humanity today is whether to start a global AI arms race or to prevent it from starting. If any major military power pushes ahead with AI weapon development, a global arms race is virtually inevitable ..."

From the letter presented at the
International Joint Conferences on Artificial Intelligence (IJCAI)
Buenos Aires, 28 July 2015

The Precautionary Principle

The Precautionary Principle

"When an activity raises threats of harm to human health or the environment, precautionary measures should be taken even if some cause and effect relationships are not fully established scientifically. In this context the proponent of an activity, rather than the public, should bear the burden of proof.

The process of applying the Precautionary Principle must be open, informed and democratic and must include potentially affected parties. It must also involve an examination of the full range of alternatives, including no action."

The "Wingspread Statement on the Precautionary Principle", Wingspread Center, Racine, Wisconsin, USA, January, 1998
